Name: _____ Homeroom: _____

CBA Science Lab Reports

After a student does a lab activity in science class they will be asked to write up the activity in a formal lab report. Lab reports are to be kept in the student's science notebook and will be turned in for grading every 2-3 weeks. Students are encouraged to type their lab reports but it will not affect their lab report grade.

Format for Lab Reports

Title: Each activity sheet bears the title of the activity.

Procedure: A brief paragraph describing what you did in class; may be copied or paraphrased from the activity sheet.

Observations: A description of what you saw during the activity; include all measurements, times, temperatures, etc. May take the form of a drawing, chart, or graph where appropriate.

Conclusion: What you learned from the activity; usually, but not always, will be the answer to a specific question from the activity sheet.
